Wabo® FlameGuard II - Life Safety Series Model(s) "UFG" & "UFG Corner" 4"-12" Horizontal Fire Barrier Systems

The following installation procedure is very important and must be fully understood prior to beginning any work. To ensure proper installation and performance of expansion joint system the following actions must be completed by the installing contractor. Failure to do so will affect product warranty and fire barrier performance.

- 1) Carefully read and understand installation procedure. Contact WBA's Technical Service Department at (800) 677-4922 for product assistance.
- 2) Inspect all shipments and materials for missing or damaged components and hardware. Contact Customer Service at (800) 677-4922 with WBA's order number and invoice for prompt assistance.
- 3) Inspect substrate or adjacent construction for acceptance before beginning work. Report unacceptable construction to the project manager for scheduled repair work.
- 4) Review WBA shop drawings for project specific detailed information if Engineering services were purchased at time of order.

All technical or other advice by Company, whether verbal or written, concerning products, or the use of products in specific situations ("Advice") is given by Company and is used at the Users own risk.

Installation Procedure

1

Prepare concrete block out for installation of fire barrier. Deficiencies in block out base and spalled edges must be corrected prior to beginning work.
Note: Contractor to repair any spalled edges with a Repair Material approved by the Buildings Structural Engineer.

2

Mark fire barrier splice locations and outline edges of splice transition as shown.

Splice Transition

Concrete Slab

Corner

3

After splice locations have been determined, secure splice transition utilizing duct tape to concrete slab as shown in photo.

Note:
Do not locate wood blocking or spreaders at fire blanket insulation washers

4

Insert 10' section of fire barrier into opening. Ensure that end of fire barrier is located on centerline of Splice Transition. Once fire barrier is inserted into opening, mount wood blocking insert and wedge wood spreader to expand fire barrier to its correct position.

Notes:

1. Wood blocking and spreader is required to ensure that fire barrier is installed tight to adjacent concrete construction.

Wood Blocking

Required only when system incorporates third Fire Barrier Blanket outside of metal retainer as shown in photo above. Not required if third blanket is not used.

Model	"A"	"T"
UFG-1201,1201C,1202,1202C	10"	1"
UFG-1001,1001C,1002,1002C	8"	1"
UFG-801,801C,802,802C	6"	1"
UFG-601,601C,602,602C	4"	1"
UFG-401,401C,402,402C	2"	1"

5A

Once fire barrier has been blocked open, mark and drill holes for 1/4" x 2 1/4" lg concrete sleeve anchors spaced at 9" O.C. Once the holes have been drilled, remove powder dust exercising care not to get debris into fire blanket assembly. Install concrete sleeve anchor with washers.

5B

Once fire barrier has been blocked open, mark and drill holes for 1/4" x 2 1/4" lg concrete sleeve anchors spaced at 9" O.C. Once the holes have been drilled, remove powder dust exercising care not to get debris into fire blanket assembly. Install concrete sleeve anchor with washers.

CP601S Fire sealant applied to each individual layer.

1/4" Concrete Sleeve anchor and washer

6

After the first section of fire barrier has been installed, apply CP601S sealant to all blanket layers of the fire blanket assembly(Except: slice transition).

Installation procedure: "UFG" FlameGuard II system

Splice Line
(No Gaps)

7

Repeat Step 4 with next section of fire barrier. Install next section ensuring that there are no gaps at the splice location between blankets, as shown above.

Note:

To remove small gaps between sections of fire barrier gently tap opposite ends of metal retainers with a hammer and wood blocking to slowly move the fire barrier forward compressing the CP601S sealant at the splice line. Exercise care not to damage fire barrier blanket where wood blocking is applied.

8

After the next fire barrier section is in place, repeat step 5A or 5B.

9

With installation complete temporarily cover system to ensure debris does not enter fire barrier cavity. It shall be the installers responsibility to protect completed fire barrier installations. Damaged Fire Barriers will be replaced at installers expense.
